Summary

Detail-oriented Computer Science undergraduate with a strong foundation in Python, data analysis, and full-stack web development. Experienced in building user-focused applications and extracting actionable insights from data. Actively seeking a software engineering internship to apply and expand technical expertise in production environments.

Experience

Quantum (Forage) – Software Engineering Virtual Experience Feb 2026 – Mar 2026

- Analyzed datasets using Python (Pandas) to identify trends and generate insights.
- Developed an interactive dashboard to visualize key business metrics.
- Implemented automated test cases using Pytest to improve code quality and reliability.

Electronic Arts (Forage) – Software Engineering Virtual Experience Jan 2026 – Feb 2026

- Applied object-oriented design principles to propose system features.
- Created UML class diagrams to model system architecture.
- Improved data models to enhance system efficiency and scalability.

Education

Bachelor of Technology (Computer Science) 2024–2028

Jamia Hamdard University

Senior Secondary (Class XII) 2022–2023

Hamdard Public School

Technical Skills

- **Languages:** Python, JavaScript, SQL (MySQL)
- **Core Concepts:** Data Structures, Object-Oriented Programming (OOP)
- **Web Development:** HTML, CSS, Responsive Design
- **Tools & Platforms:** Git, GitHub, Pytest
- **Other:** Generative AI, Prompt Engineering

Projects

Personal Portfolio Website *HTML, CSS, JavaScript*

- Developed a fully responsive single-page portfolio with dark/light mode functionality.
- Built interactive UI components and implemented smooth scrolling for improved user experience.
- Optimized performance for mobile devices and ensured cross-browser compatibility.
- Deployed using GitHub Pages.

Leadership & Activities

IEEE Jamia Hamdard Student Branch 2025–Present

- Participated in technical workshops and collaborative problem-solving sessions.
- Engaged in discussions on software development and emerging technologies.
